MAHAKGUPTA

+91-9005936293 • 2K24.cs1j.2411302@gmail.com • LinkedIn • GitHub

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and software development. Passionate about building AI-powered applications, solving real-world problems, and continuously improving technical skills through projects, internships, and competitive programming.

EDUCATION

Pranveer Singh Institute of Technology Kanpur, Uttar Pradesh
Bachelor of Technology (CSE) — CGPA: 8.5 2024 – 2028

EXPERIENCE

UI/UX Design Intern | CodSoft Jun 2026 – Jul 2026

- Completed a 4-week virtual internship focused on user interface and user experience design workflows.
- Designed user-centric wireframes and responsive UI prototypes for web and mobile application interfaces.

Cyber Security Virtual Intern | Deloitte (Forage) Jun 2026

- Completed a practical job simulation centered on core enterprise cybersecurity concepts and risk analysis.
- Analyzed security scenario tasks to generate actionable technical insights and recommendations.

PROJECTS

AI-Enabled Smart Banking Assistant | React.js, FastAPI, WebSockets, Gemini 1.5 Flash, LangChain, MongoD 2026

- Developed a responsive **React.js** frontend interface for an **AI banking assistant** across branch kiosks and contact centers.
- Integrated **REST APIs** and **WebSockets** to enable real-time customer interactions, live transaction updates, and **seamless streaming.**
- Collaborated on **RAG-based multilingual conversational AI,** voice support, and secure core banking **authe ntication workflows.**
- Designed intuitive UI components for **interactive AI chat,** transaction tracking, and **automated agent handoffs.**

AI-Powered Urban Heat Mitigation System | Python, XGBoost, SHAP, GIS, Streamlit Sept 2025

- Engineered an **AI decision support system** using satellite and geospatial datasets to detect **Urban Heat Island (UHI)** hotspots.
- Built an **XGBoost pipeline** training on **LST, NDVI, NDBI, NDWI, Albedo,** and **Population Density** features for heat prediction.
- Integrated **SHAP Explainable AI (XAI)** to interpret feature importance and identify key drivers of localized urban heat intensity.
- Designed an interactive **Streamlit dashboard** mapping heat intensity, risk analysis, and targeted **cooling interventions.**

TECHNICAL SKILLS

- **Languages:** Python, C, Java, JavaScript, SQL
- **Web Technologies:** React.js, Node.js, Express.js, REST API Design, HTML5, CSS3, Tailwind CSS
- **Databases:** MongoDB, MySQL
- **AI/ML:** Machine Learning, Generative AI, Agentic AI
- **Core Concepts:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), DBMS
- **Developer Tools:** Git, Postman

CERTIFICATIONS AND ACHIEVEMENTS

- **Problem Solving (Basic)** – HackerRank *October 2026*
- **Supervised Machine Learning: Regression & Classification** – DeepLearning.AI & Stanford *June 29, 2026*
- **Google AI Professional Certificate (7 Courses)** – Coursera *June 17, 2026*
- **Data Analytics Job Simulation** – Deloitte (Forage) *June 10, 2026*
- **Introduction to SQL** – Simplilearn *June 2026*
- **Introduction to Generative AI and Agents** – Microsoft *May 2026*
- **Trust and Security with Google Cloud** – Google *May 2026*
